

The Terrestrial Planets
(also known as the Rocky Planets or Inner Planets)

	Mercury	Venus	Earth	Mars
Origin of Name				
Symbol used to represent planet				
Diameter of the Planet (km)				
Distance from the Sun (km)				
Gravity (g/cm³)				
Length of Orbit (km)				
Length of 1 year on the planet (Earth Days)				
Length of 1 day on the planet (Earth hours)				

The Terrestrial Planets
(also known as the Rocky Planets or Inner Planets)

	Mercury	Venus	Earth	Mars
Does it have an atmosphere? If so, what is it composed of?				
Temperature Range (Celsius)				
Type of Terrain				
Major Surface features				
Does it have a ring system?				

The Terrestrial Planets
(also known as the Rocky Planets or Inner Planets)

	Mercury	Venus	Earth	Mars
Number of Moons				
Name of the Moon(s)				
Other Interesting Facts or Information				
How long would it take to get there from Earth?				
<u>Bonus:</u> Your age ("years") if you had been born there.				
<u>Bonus:</u> Your weight on the surface (kg)
